

Richard Jacques, Number One

When the day is done, when the race is won
My life has only just begun
When you're next to me, so much more I can see
There's nowhere that I'd rather be

When I'm away from you and there's nothing I can do
Do you think the same things too
When the time has come, I don't want you to run
You know that you're the only one

All I need is you for always and forever
All you need is me, just listen when I say
All we need is love for us to be together
'Cos you're my number one

At the end of each day, or whenever you're away
There's always things I want to say
But wherever you go you will always know
That I've got so much more to show

You're my number one prize when I look into your eyes
It's only then I realize
You're the one for me, there's no one else I want to see
There's no place I'd rather be

All I need is you for always and forever
All you need is me, just listen when I say
All we need is love for us to be together
'Cos you're my number one...
