

Richard Jacques, Work It Out

We all need to work together to build a better life
To make it what we feel, we have to make it real
We all need to remember that nothing in this world comes for free
We have to make it what we want
Just you and me and everybody

Work it out, work it out, think about it
Work it out, work it out, talk about it
Work it out, work it out, make it happen
Let's work it, work it out...
We've got to make it real, we've got to make it real
We've got to make it real, we've got to make it real

We all know that life gets harder, it's getting harder day by day
We can show that we are trying, we're making sure that everyone can stay
You're someone I can depend on, no one else can put it right
I'm someone you can rely, 'cos we're not giving up without a fight

Work it out, work it out, think about it
Work it out, work it out, talk about it
Work it out, work it out, make it happen
Let's work it, work it out...
We've got to make it real, we've got to make it real
We've got to make it real, we've got to make it real

Work it out, work it out, think about it
Work it out, work it out, talk about it
Work it out, work it out, make it happen
Let's work it, work it out...
We've got to make it real, we've got to make it real
We've got to make it real, we've got to make it real
