

Richard Marx, Think It Over

You say you wanna see the city lights
'Cause they shine so bright
And they are calling you
Before you go
I need to know I won't stand in your way
But I want you to stay

I remember those summer nights
When I held you tight
And it felt so rite
I thought what we had would never end
And now your leavin

Chorus:
Baby, think it over, think it over
Before you walk away
Baby think it over, think it over
Before you turn the page
I want you to stay

You say you're going to be star
But to me you are
And I never would ask you to change
I really want you to chase your dreams
But the pain in me is just so hard on me

I remember those summer nights
When I held you tight
And it felt so right
I thought what we had would never end
And now your leavin

chorus

Stay 'till the morning comes
I hope a change of mind
One last chance for you to see
But you leave me behind

I remember those summer nights
When I held you tight
And it felt so right
I thought what we had would never end
And now you're leavin

chorus 2x
