

Rick Springfield, She's Alright

I only know that there is something about you
You turn me on when I'm in and around you
I can't understand why nobody told you that you're alright
Alright

You give me love anytime that I want it
I turn around you've already responded
Can't understand why nobody told you that you're alright
Alright

I've got something and you've got something
And we've got something that's here to stay
Realizing that there's no surviving without a life full of love
LOVE

She's the girl that is one in a lifetime
And pretty soon I'll be making it wifetime
Can't understand why nobody told her that she's alright
Alright

I've got something and you've got something
And we've got something that's here to stay
Realizing that there is no surviving without a life full of love
LOVE

I only know that there is something about you
That turns me on when I am in and around you
Can't understand why nobody told you
You're alright
