Ride the Sky, The End of Days

Seeing a world cast in shadow Seeing it all waste away I am a flower fading The last and none, none to come I will live through the cleansing I will bear witness to all I'm gonna pray for us For what's left behind For our broken hearts [Chorus] The end of days is drawing near So the rain will fall like tears But the dusk of life will be the dawn And the circle will be drawn - again Here is the wind, can you hear it? Singing the song of rebirth The song of you and me The song that marks the new beginning [Chorus] The end of days is drawing near So the rain will fall like tears But the dusk of life will be the dawn And the circle will be drawn - again Yeah, the end of days comes closer What's left behind for us? I want to know [Chorus] The end of days is finally here And the rain will fall like tears So the dusk of life will be the dawn And the circle will be drawn - again
