Rikki, Only The Light (Eurovision 1987)

It's only the light That fades through the night A shadow has fallen And the darkness, it's callin' Shadows walkin' behind me Strange lights, won't let them blind me Voices runnin' on through my mind Survival, got to get on with life It's only the light That fades through the night A shadow has fallen And the darkness, it's callin' It's only the light After me It's only the light I can see the light It's only the light Can't you see the light? It's only the light Only light Mirrors, I see your reflection Moving in every direction I can't see, it seems so confusing So touch me, remove this illusion It's only the light That glows in the night The spirit that moves me The spirit that moves free It's only the light After me It's only the light

I can see the light
It's only the light
Can't you see the light?
It's only the light
Only light

It's only the light
I can see the light
It's only the light
Can't you see the light?
It's only the light

Only light It's only the light
