

Riot 99, California's Burning

Suntan lotion and steroid smiles all
along muscle beach,
narcissism says the perfect body is the goal
to reach,
meanwhile out in the Pacific ocean a
tsunami starts to rise,
mother nature has lost her patience with
her human prize.

Western Civilization,
Enter the Californian dream,
All across the Nation,
It's ripping apart at the seams.

Consumerism has reached it's peak in the
land of the free,
multi-national take-over life as commodity,
they calculated your wealth on a sliding scale,
and used the Constitution to cover their trail.

California is burning <i>[x many]
