

Rita Redshoes, Hold Still

In this little town
Cars, they don't slow down
The lonely people here
They throw lonely stares
Into their lonely hearts

I watch the traffic lights
I drift on Christmas nights
I wanna set it straight
I wanna make it right
But girl, you're so far away

Oh, hold still for a moment and I'll find you
I'm so close, I'm just a small step behind you, girl
And I could hold you if you just stood still

I jaywalk through this town
I drop leaves on the ground
But lonely people here
Just gaze their eyes on air
And miss the autumn roar
I roam through traffic lights
I fade through Christmas nights
I wanna set it straight
I wanna make it right
But man, you're so far away

Oh, I'll hold still for a moment so you'll find me
You're so close, I can feel you all around me, boy
I know you're somewhere out there
I know you're somewhere out there

Oh, hold still for a moment and I'll find you
You're so close, I can feel you all around me
And I could hold you if you just stood still
Oh, I'll hold still for a moment so you'll find me
I'm so close, I'm just a small step behind you
I know you're somewhere out there
I know you're somewhere out there
I know you're somewhere out there
