

# Robert Earl Keen, Jr., I Wonder Where My Baby Is

I wonder where my baby is tonight  
I wonder where my baby is tonight  
That street lamp ain't sayin'  
The moon is out of sight  
I wonder where my baby is tonight

I love her more than roses love the sun  
I love her more than roses love the sun  
I've told her and I've told her  
Baby you're the only one  
I love her more than roses love the sun

She's been gone since early morning  
She left here early yesterday  
I lost my head and said some things  
I didn't mean to say  
She's been gone since early yesterday

She doesn't know the danger she'll find  
She doesn't know know the danger she'll find  
With no one to protect her  
In a world that's so unkind  
She doesn't know the danger she'll find

I've been every place from Cherry Street to Main  
Every place from Cherry Street to Main  
My mind is sick with worry  
From callin' out her name  
Every place from Cherry Street to Main

I wonder where my baby is tonight  
I wonder where my baby is tonight  
That street lamp ain't sayin'  
The moon is out of sight  
I wonder where my baby is tonight
