

Rock Kills Kid, Beside Me

In the summer clouds I see your face
Everywhere I go you follow me home
And when I want to sleep I just can't do it
Everywhere I go you follow me

And when I look you're always there
And when I walk you're right behind
And when I fall down on the floor
You're right beside me
Right beside me

Anytime I try to be alone
Everywhere I turn you follow me home
And when I go outside you're waiting for me
Anything at all you get to me

And when I look you're always there
And when I walk your right behind
And when I fall down on the floor
You're right beside me
Right beside me

You come around
You watch me work
Losing self control again
You never mind and I wonder why
You never mind anything at all

And when I look you're always there
And when I walk your right behind
And when I fall down on the floor
You're right beside me
Right beside me

When I look in front of me
And when I'm walking down the street
And when I get down on my knees
You're right beside me
Right beside me
