

Rockmelons, Stronger Together

Close your eyes, picture me

Standing in a field of dreams by the deep blue sea

Birds are flying on the wing

But I can't hear a song they sing

Between the machines

There's a warning

Danger sign is straight ahead

Gotta stop and look and listen

Ring a bell alarm inside your head

Stronger, together, together, forever

Open your eyes see yourself

Asking for somebody's help

In a land that time forgot

Realise in your life

Fate alone can soon decide

Who's a have and have not

There's no reason, not to try and take a chance

Find something to believe in

Love is all we got to make it last

Stronger, together, together, forever

There's no reason, not to try and take a chance

Find something to believe in

Love is all we got to make it last

Just build it up, build it up until we're

Stronger, together, together, forever
