

# Rodney Crowell, Through With The Past

How long did I live in a dream?  
How much time did I squander?  
What made it all fall apart at the seams?  
What was the spell that I went under?  
Sometimes I was lost in a bubble  
It was the cause of a whole lot of trouble  
But that's all right  
I feel strong about the future, baby  
I'm through with the past

How deep are the scars that he gave you?  
just how far can one man take it?  
I'm no knight on a white horse comin' on strong just to save you  
But if you take my hand I think we can make it  
The proof is when I feel my arms around you  
And the truth is I just can't believe I found you  
Tonight's the night we get started on the future, baby  
'cause I'm through with the past

It's a bitter man going backwards  
On a wide road, straight and long  
I don't care what we left back there  
I look forward from now on

You know that I'll be anything but perfect  
But I swear to you I'm gonna make it worth it  
Tonight's the night we get started on the future, baby  
I'm through with the past -- Yes I am  
So turn out the light let's get started on the future, baby  
I'm through with the past
