

Roger Tylor, Killing Time

I live on a satellite
Sun shines on a sea of steel
Ice-men in kryptonite
Cavemen on wheels
Here in our own small way
Just passing the time of day
Time goes by and
We're treading the same old wheel
Killing what we can't steal
Days go by just killing time
Days go by
I'm living in paradise
Sunset across the shield
Paradise--ain't so nice
Some raw deal
Here in our own sweet way
Passing the time of day
Time goes by and
We're treading the same old wheel
Smothering all that's real
Ring the bell it's killing time
Days go by
Just killing time
I'm taking a fast flight
Straight course through the force fields
I've seen the real sights
Caveman appeal
Here in our own small way
Passing the time of day
Time goes by and
We're treading the same old wheel
Smile but we just don't feel
All fall down it's killing time
Days go by
Just killing time
