

Rooster, Clear Skies

Clear Skies

Did anybody see our battles won and lost
Before we found the lines to cross
Did anybody hear the things we didn't mean
And the silences in between
You're waiting for a fall
You're always running from a storm
So when you feel alone

(Chorus)

Look in my direction
When you think we've disappeared
Close your eyes and you will see it you can feel it
The sky's about to clear

And no one else can see the side of me I show
When it's you and me alone
And no one else can hear the things that you don't say
Things that I already know
Stop waiting for a fall
You can't keep running from the storm
So when you feel alone

(Repeat Chorus)

And no one understands the things you do in me
Gives me strength to set them free
And no one else can know the colour that you show
See your shadow slowly grow

I'll catch you if you fall
I'll give you shelter from it all
So when you feel alone

(Repeat Chorus)
