

# Rory Gallagher, There's A Light

There's a light that shines on me  
ever since you came to me  
It won't go, it won't go away  
Now i know that you're gonna stay  
Now that i know  
your love means so much more to me now

Come here now baby  
Now look what you've done to me now  
I don't pray for what could have been  
I feel i'm flyin naturally

I can fly but i won't go away  
In your sky that's where i wanna stay

Come here now baby

Now look what you've done to me now  
If i don't show would you know  
where to look for me now

I do not stare absently  
Counting waves up on the sea  
Now i know where i wanna stay  
There ain't no hard decisions to make

Come here now baby  
Now look what you've done to me now  
If i don't show would you know  
who to send for me now

There's a light (x3)
