

Rosenfeld, Till Death Do Us Part

Shed a little light on my life
Shine on me during the nighttime
The road's been so dark without you by my side
Last time I dreamed of heaven
White dress looking like an angel
I wish I could hold you
I wish I could treat you

The way a woman of your kind
Should be treated by any man
I've lost myself in your eyes
For you I'd bleed, I'd bleed myself dry

Oh I love you so
I love you so
I'll love you until death do us part
Oh I love you so
I love you so
I'll love you until death do us part
Until death do us part

So high on life don't care what happens
Through highs and lows your heart's wide open
Just go with the flow before the dark takes us both
So beautiful when you're by yourself
You're too scared to say your farewells
But you'll come around and
Get used to the pain

It's gonna be fine
If you stay here by my side
Let the sun set on your life
And I'll make, oh I'll make you mine

Oh I love you so
I love you so
I'll love you until death do us part
Oh I love you so
I love you so
I'll love you until death do us part
Until death do us part

You see through the lies
What's hiding behind
My blasphemous eyes
The secrets I hide

Oh I love you so
I love you so
I'll love you until death do us part
Oh I love you so
I love you so
I'll love you until death do us part
Until death do us part

Oh I love you so
I love you so
I'll love you until death do us part
Oh I love you so
I love you so
I'll love you until death do us part
Until death do us part
Oh I love you so
I love you so

I'll love you until death do us part
Oh I love you so
I love you so
I'll love you until death do us part
Until death do us part
