

Rufio, Over It

I can't believe that your wasting your time
Thought you could find your way back
You heard my story but heard it all wrong
Nothing...

Well it's just so little
That I can see through you
We know it will end
This distance is secret
It's seeping out my skin yeah

I was over it before
But you brought me back to where I began
And I'm starting well again
And I remain here until the end

I can't believe that your wasting my time
Honestly I've heard it all
Bringing out your colors of natural glow
Cuz all you want's to know that I'm yours

Cuz it's just so little
That I can see through you
We know it will end
This distance is secret
It's seeping out my skin, yeah'

I was over it before
But you brought me back to where I began
And I'm starting well again
And I'll remain here until the end

And I cant believe it anyway
When our differences are the same
Your not listening anyway
It's over

And I cant believe it anyway
When our differences are the same
Your not listening anyway
Its over...

I was over it before
But you brought me back to where I began
And I'm starting well again
And I'll remain here...
I was over it before
But you brought me back to where I began
And I'm starting well again
And I'll remain here
