

Rufus King, Mean Bean

I know exactly who you see now
Where's you going baby
Where's you going baby?
And I know exactly what you say now
What says you baby?
What saying 'baby, make me turn so blue?'

And I know exactly what you do now
What you doing baby?
What you doing baby?
And I know exactly why you love me
It's them green bags honey
It's them green spots flashing before your eyes

Chorus: when I get down
(And everybody's done for messing around)
Yeah when I get down
(And everybody's done for messing around)
When I get down
(And everybody's done for messing around)
Woo got a lot of this town
When I get down
Why is everybody always messing around?

And I know exactly who you see now
Where's you going baby?
Where's you going baby?
And I know exactly what you say now
What says you baby?
What says you baby make me turn so blue?

And I know exactly what you do now
Wont you do me baby?
C'mon do me baby?
And I know exactly why you love me
It's them green bags honey
It's them green spots flashing before your eyes

And I know exactly who you do now
Find that worm we'll drag 'em down
Teach 'em never to
Ever ever to mess around

And I know exactly why you love me
It's that you think you're above me
But that works
Baby did I say that I love you

Chorus
