

Rufus King, Stupid To Wish

Well you know that this brings me down
When you leave your head in the clouds
It's not perfect to love me like Saturday night
That'll make everything alright

Well it's stupid to wish for what we don't have
It's better that you're never ever coming back
It's not just me it's worse all the words
Can't forget how they hurt
'Cause you need 'em all the same

No

Chorus-

And now do you see asleep at the wheel
You know that it's my life that you steal

Tell me you're finally mine for real x2

What's better than this?
It's not hard getting used to bliss
And know what it's like to be drunk all night
Lost inside with those terrible lies

I'm out of the loop I'm cut in two
It's crazy to think that you love me too

It's not just me it's worse all the words
Can't forget how they hurt
But you need them all the same

No

Chorus*

And lord there's no better pain than living day to day
Oh lord there's no better pain than living day to day
Day to day
Yeah

It will be ashame if you fade
Into nothing someday
So I'll keep you close and and

It's not just me it's worse all the words
Can't forget how they hurt
But you need them all the same

Chorus* x2

And why can't you still love me
Why can't you still love me
Why can't you still love me
Why can't you still love me
