

Run Into The Shadows, You Know Who You Are

Im stuck in my own mind
It tears me up inside
But every time I let this out
We collide
We came together as one
But we left separate before the night was done
Dont turn this around on me
Because inside you start to feel guilty
The hands on this clock spin round and round
We both leave here with sympathetic pride
I wont say love you
Then we both go down
Well never live this
Down tonight!
Right now!
Right now!
Darling its time to face your fears
You got the knife behind your back
Just keep quiet and plan your escape
No dont even say a word
The hands on this clock spin round and round
We both leave here with sympathetic pride
I wont say love you
Then we both go down
Well never live this
Down tonight!
Right now!
Right now!
Were stuck in this place
And made my mistakes
I calm myself down
And let you fall out
Were stuck in this place!
And made my mistakes!
I calm myself down!
And let you fall out!
Fall out!
Fall out!
Fall out!
Yeah!
You pick it up!
Im stuck in my own mind
It tears me up inside
But every time I bring this up
We collide
The hands on this clock spin round and round
We both leave here with sympathetic pride
I wont say love you
Then we both go down
Well never live this
Down tonight!
Right now!
Right now!
Right now!
Right now!
