

Run Level Zero, Shine

The scorching heat / the devastation
Blazing sun / annihilation
We reach out / blind with love
A man in its core / silicon based
Great cities / coboloid race
Transformations / configurations

Shine little star
Twinkle twinkle
I know who you are

An entropy war at the end of time
A last convulsion, millennium chime
In the background we fade away
A slow waltz into radiation
Time stops, inverted creations
Spiraling down like burning leaves

Shine little star
Twinkle twinkle I know who you are
Shine little star

They will do it again
