

Runrig, The Apple Came Down

Life support genius at the end of time
The greatest living brain alive
A breath of chance matter from a falling star
The power is sour and reaches far

The apple came down
It had to fall
Where men grew wise
Minds grew small
Newton and Adam
Lost and found
The apple must fall
To the ground

There's not long left, it's a race against time
The saint's close, he could lose his mind
Like he lost his body here on planet Earth
When he holds the key to the universe

The apple came down
It had to fall
Where men grew wise
Minds grew small
Newton and Adam
Lost and found
The apple must fall
To the ground

A mighty spark to keep him there
Trigger to power, wire to pain
Direct inject pleasure when the going gets rough
Don't believe in God and all that stuff

The apple came down
It had to fall
Where men grew wise
Minds grew small
Newton and Adam
Lost and found
The apple must fall
To the ground

The apple came down
The atom must fall
