

Rush, The Body Electric

One humanoid escapee
One android on the run
Seeking freedom beneath a lonely desert sun

Trying to change its program
Trying to change the mode...crack the code
Images conflicting into data overload

[Chorus:]
1 0 0 1 0 0 1
SOS
1 0 0 1 0 0 1
In distress
1 0 0 1 0 0

Memory banks unloading
Bytes break into bits
Unit One's in trouble and it's scared out of its wits

Guidance systems break down
A struggle to exist
To resist
A pulse of dying power in a clenching plastic fist

[Chorus]

It replays each of the days
A hundred years of routines
Bows its head and prays
To the mother of all machines
