

Russ, Last Night

I didn't know that last night was our last night together, did you?
I didn't know today was the day I was gonna say goodbye to you
Do you know that I love you, know that I want you to stay?
I didn't know today was the day I was gonna say goodbye to you

When you were layin on my chest I didn't know (did you, did you?)
When that screen went black and credits rolled (did you, did you?)
Did you know, the sun was on it's way?
Did you know?
I wish you told me (I wish you told me)

I didn't know that last night was our last night together, did you?
I didn't know today was the day I was gonna say goodbye to you
Do you know that I love you, know that I want you to stay?
I didn't know today was the day I was gonna say goodbye to you

You left me stranded
Don't know what to do with what I'm handed
Don't know where to go and where I'm landing, if I'm landing
Did you plan this?
Oh it's damaging
I'm unraveling
Hardly managing
Most days battling questions I don't have answers too
Like what did I what did I what did I what did I do?

I didn't know that last night was our last night together, did you?
I didn't know today was the day I was gonna say goodbye to you
Do you know that I love you, know that I want you to stay?
I didn't know today was the day I was gonna say goodbye to you
