

# Russell Watson, I Don't Know How I Got By

How did I wake up each day,  
Before that moment I saw your face  
Where was I before your touch  
Nowhere is where I was without you.  
Without you in, my life was just a lie,  
Before you I don't know how I got by.

Before I met you, before I held you in the night,  
I don't know how I survived.  
Before I found you, before you made everything right,  
I was hurt for life.  
Wasn't really living 'til you came into my life  
I got through it baby,  
But I don't know how I got by.

How did I get through those nights  
Before that moment I held you tight.  
Where was I before your kiss  
How did I exist without you.  
Life had no meaning, no reason and no rhyme,  
Before you I don't know how I got by.

Before I met you, before I held you in the night  
I don't know how I survived.  
Before I found you, before you made everything right.  
Wasn't really living 'til you came into my life,  
I got through it baby,  
But I don't know how I got by.

I thank God when I wake up,  
I'm waking next to you.  
I don't know what I was living for, before you,  
before you whoooah!!!

Before I met you, before I held you in the night  
I don't know how I survived.  
Before I found you, before you made everything right,  
I was hurt for life.  
Wasn't really living 'til you came into my life  
I got through it baby,  
But I don't know how I got by.
