Ryan Adams & the Cardinals, Magick

You're like a rain cloud If it rained mushroom clouds Everybody hits the ground Arms folded, head down You're like a missile strike Government goes underground Warhead on legs What goes around comes around Goes around comes around What goes around comes around

So turn the radio on So turn the radio up So turn the radio up loud and get down Let your body move Let your body sway Listen to the music play It's magick It's magick

You're like a storm tower if it had fire power Everything you touch burns Scorched earth Water tower burned up to the ground Zombies runnin' all around Eventually we hit the mall And knock it down at nightfall

So turn the radio on So turn the radio up So turn the radio up loud and get down Let you body move Let you body sway Listen the music play It's magick

I wish I had secret powers I'd burn all the power up ?? And shut 'em down Give them radios and ? Wake them up with jams Right after I disappear In this song, this song, this song Watch the record go round

Listen to the magick, magick, magick Listen to the magick and watch the record go round Listen to the magick, magick, magick Listen to the magick and watch the record go round What goes around comes around Because what comes around goes around
