

# Sabaton, Hellrider

Engines are running our blood burns like oil  
Head one by one down the highway  
Tires are screaming leave trails on the road  
The sirens of death heading our way

We'll always be one step ahead  
We'll not fall back

Pedal to metal rock hard and ride free  
The philosophy of a rider  
Don't use the brakes ride on faster instead  
Adrenaline taking you higher

Fall back in line or stand away  
We like it fast

Into hell we ride fast as lightning  
Enter the darkness the weak ones will pay  
Ride through fire cause revolution  
That is a hellrider's way

Crushing the traitors to no man we kneel  
The power is at our command  
Nothing can stop us it's head over heel  
United together we stand

If it's too hard then you're too weak  
You're in our way

Into hell we ride fast as lightning  
Enter the darkness the weak ones will pay  
Ride through fire cause revolution  
That is a hellrider's way

Engines are running our blood burns like oil  
Head one by one down the highway  
Tires are screaming leave trails on the road  
The sirens of death heading our way

If you ain't tough enough to play  
Get out our way

Into hell we ride fast as lightning  
Enter the darkness the weak ones will pay  
Ride through fire cause revolution  
That is a hellrider's way
