

Sabrina Carpenter, things i wish you said

Baby

Sorry i left you in the dark

I always reach for your leg over there on your side of the car

baby

everything reminds me of you

Nobody gets my jokes

everyone here thinks I'm fucking rude

when i saw you cry i didn't handle it well

without you here i don't know what to do with myself

I think about these things at night before i fall asleep

things i wish you said to me

things like

darling

I Hope u know it scared me to death

The night that your sister said that you got in an accident

and god i

I'm watching everything that you do

I can't get your songs out of my head

Or your hair out of my room

I saw you met somebody and I'm jealous as hell

that I can't even stomach loving somebody else

I think about these things at night before i fall asleep

things i wish you said to me

Sorry that i pulled the it's not you it's me

One day I'll make sure you get a real apology

I waste my time i waste my life on idiotic

like things you never said

Things you'll never say to me
