

# Saga, Too Deep

Zero Hour-----I've gotta get a move on  
But where I'm going I don't know  
Ice & fire-----The light is all around me  
Situations touch and go  
Feel that heat-----I wanna seize the moment  
Now before the moment's gone  
To the wire-----We'll talk about it later  
'Till then the search goes on

Too deep for the tears  
You left me waiting here  
Just frozen in fear  
Those cold uncertain times  
Too deep for the tears  
The passage of those years  
Has dried up the sea  
Of hope that's held me near

Cloud of stars-----The freshness of a vision  
Fast forward & fade to black  
Aftermath-----I'm running by the hour & there's no turning back  
Heart & soul-----The price is getting' higher & the coast is clear but steep

Sunken sun-----Creates a world of shadows  
But I'm in too deep

[repeat chorus]

Seeds of change-----I know the day is comin'  
But the hour is getting late  
Keep the faith-----although it's getting harder  
I know I just can't wait

[repeat chorus]
