

# Sahlene, Runaway

Did somebody dare to tell what's right  
Which colours to wear to laugh or cry  
You want to be fair and maybe you're right  
Let's burn our fingers stop the fight

Always driving through the red lights babe  
Everybody stops but me

Just run away to the stars  
Just run away 'til you're high enough  
I will be waiting above  
And make that happen I tried so hard

How lucky you are your statement in fine  
Because what you think is what you find

Always driving through the red lights babe  
Everybody stops but me

Just run away to the stars  
Just run away 'til you're high enough  
I will be waiting above  
And make that happen I tried so hard

Just run away to the stars  
Just run away 'til you're high enough  
I will be waiting above  
And make that happen I tried so hard

Did somebody say it's gonna be easy  
Til you get to where you do belong  
Your newly opened mind explains the reasons  
Why you have to carry on

Just run away to the stars  
Just run away 'til you're high enough  
I will be waiting above  
And make that happen I tried so hard

Just run away to the stars  
Just run away 'til you're high enough  
I will be waiting above  
And make that happen I tried so hard
