Salad, Planet In The Ocean

Somebody told me there's a planet in the ocean We call it love of the girl But we don't wanna be the potion It's such a savoury world There's a planet in the ocean They call it love of the girl Such a commotion Cos it's apparently curled

Chorus:

Dichotomy, It's all around me now It's all around me now I'll wait for you somewhere

Well there's a planet in the ocean They call it love of the girl Did you bring the suntan lotion And the parasol furled In the ocean It's a terrible world Careful with the axis This planet's love of the girl

Repeat Chorus
