

Saliva, I'm Coming Back

Are you ready?
What happened to the world we grew up in
Was it this dangerous?
What happened to the way we treat our friends?
So less serious
What happened to the way we used to be
Are we serious?
I just wanna make it all go away
And get back to us
When the road's too long, to follow
When the pain's too much, to swallow
When it seems there's no tomorrow
Just hold on, just hold on
I'm coming back
Just like I promised
I'm coming back
And it won't be long
I'm coming back
Just like I promised
I'm coming back
And it won't be long
What happened to the world where love was king
Is that so yesterday
What happened to the songs we used to sing
That we're too tired to play
What happened to the way we used to be
Is it just too late
It's always darkest before dawn
Of another day
When the road's too long, to follow
When the pain's too much, to swallow
When it seems there's no tomorrow
Just hold on, just hold on
I'm coming back
Just like I promised
I'm coming back
And it won't be long
I'm coming back
Just like I promised
I'm coming back
And it won't be long
Are you ready?
(solo)
When the road's too long, to follow
When the pain's too much, to swallow
When it seems there's no tomorrow
Just hold on, just hold on
I'm coming back
Just like I promised
I'm coming back
And it won't be long
I'm coming back
Just like I promised
I'm coming back
And it won't be long
