

Sam And Mark, Measure A Man

if one day you discover broken down he's lost everything
no cars no fancy clothes to make him who hes not
the women at his side is all that he has got

why do you ask him to move heaven and earth to prove his love has worked

chorus

would he walk on water would he run through fire
would he stand before you when its down to the wire
would he give his life up to be all he can
is that is that is that.. how you measure a man

if by chance all he has to give you was three words wrap around your fingers
would that be deep enough at the end of every day
how does the women know that the man is what he says

why do you ask him or heaven and earth to prove his love has worked

chourus

ohhh....
would he walk on water would he run through fire
would he stand before you when its down to the wire
would he give his life up to be all he can
is that is that is that.. how you measure a man

he never gives up that not what he's dreamed
his world goes around thats not what he wants
to be all he can

(chourus x 2)

is that how you measure a man..
