## Sam Phillips, She Can't Tell Time

She can't tell time it's not listening to her When faith went blind I could see light through her Her vigils in the street left my youth incomplete Left meaning obsolete

Sleep I can't sleep she can speak But she can't tell time Dream I can't dream she can scream But she can't tell time

She can't tell time she didn't get what she deserved
When faith went blind she found the truth but lost her nerve
When she won't act her age the cat circles round the cage
Youth shrinks to tired rage
