

Samael, High Above

While our souls fly high above
Our bodies play their favorite games
We climb, we climb towards the light
Crawling on each other's skin
Crawling on each other's skin
We're reaching out to a higher ground
We're heading for a higher height
Down, down, down, yeah
I'm gonna take you higher baby
While our souls fly high above
Time's getting diluted
We feel at one with everything
We're alive
And we're crawling on each other's skin
The atmosphere is electrified
Our vibrations make it all so real
Cosmic pulses getting louder
Our hearts are beating harder
As I move, I move inside of you
We feel at one with everything
Rhythmic lightnings of our storm
Smooth, smooth I dance you deep
Arise your tears to grow our dreams
Far, far from here we go
To places we've never been, places we've never seen
We are one with everything
We're alive
We're reaching out to a higher ground
We're reaching for a higher height
Down, down, down yeah
I'm gonna take you higher baby
While our souls fly high above
Hearts speak aloud secrets never told
While our souls fly high above
Down here silent is the loudest scream
We move away to where we meet
Embrace the space that waits for time
Believe in us in you and me
Cross the line of what is known
We're one with everything
We're alive...

4. Reign Of Light

Back on track
Hungry for life again
Strong in will
Built out of life and force
Trained and willing
Ready to take the world
And make it our own
Alive and kicking
Fighting for what we once dreamed
Having no doubt 'bout what's coming
Feeling mature and dead real
At every crossing a new thrill

Shout it loud and proud
I'm the hyper star
Shining on your life
Keeping you from falling
Back to your own start
World is at your door

What are you waiting for
Yesterday at your back
Now take a step forward
You're your own way

Keep rolling
Don't ever let yourself drown
Keep the good vibe going
You'll never miss a thing
You're in
Come on and rise...
Free your soul
Catch the dream
Where we all shine...
Stand as you are
And let it begin
The reign of light

Free and young
Happy to be what you believe
To be is the way to be happy
More money, more lovers...
Spiritual vacuum
Takes satisfaction away
Leaving you with bitterness
To get what you want
Without having the fun of it

Keep rolling
Don't ever let yourself drown
Keep the good vibe going
You'll never miss a thing
You're in
Come on and rise...
Free your soul
Catch the dream
Where we all shine...
Stand as you are
And let it begin
The reign of light

Shout it loud and proud
I'm the hyper star
Shining on your life
Keeping you from falling
Back to your own start

Keep rolling
Don't ever let yourself drown
Keep the good vibe going
You'll never miss a thing
You're in
Come on and rise...
Free your soul
Catch the dream
Where we all shine...
Stand as you are
And let it begin
The reign of light
