

# Sammy Hagar, Little Star/Eclipse

Shine on, my little star  
I know what you are  
Time is on your side  
So shine on in the night

How much longer must I wait  
Until I cast my shell away?  
And I spread my golden wings and I fly away?  
We'll be flyin', baby

Somewhere there's a hole in the sky, yeah  
Where angels fly and slide down rainbows  
Somewhere there's a place for us  
Ooh, that has no cross nor bridges

Shine on, oh little star  
I can see you from here on Mars  
Limestones all in line  
We'll solve the mystery of space and time

So climb on  
Infinity
