

Sanctuary Rig, Spy In The Atmosphere

I am the spy in the atmosphere
I am the spy in the atmosphere
I am distant but so near
I am the spy in the atmosphere
And I'm taping everything you hear
I am the spy in the atmosphere

I am the window in the sky
I am the window in the sky
You will tell me when you lie
I am the window in the sky
And it doesn't matter what you try
I am the window in the sky

I am the ultra-violet ray
I am the ultra-violet ray
I know everything you say
I am the ultra-violet ray
And I'm with you every night and day
I am the ultra-violet ray

I am the footprint in the snow
I am the footprint in the snow
I am the voice you'll never know
I am the footprint in the snow
And I'm watching everywhere you go
I am the footprint in the snow

And you will never get away
And you will never get away
You have no choice but to stay
And you will never get away
And I'm going to make you pay and pay
And you will never get away

Well I am everywhere
Well I am everywhere
I stare and stare and stare
Well I am everywhere
You turn and I'm already there
And I am everywhere

I am the spy in the atmosphere
I am the spy in the atmosphere
Who knows when I'll appear?
I am the spy in the atmosphere
And I prey upon your deepest fear
I am the spy in the atmosphere
