

Sanctus Real, Black Coal

Do you believe in the restoration of a broken life
Hiding behind a face yeah you never know what you might find
There in the darkness beneath the surface of time and space
Could be a treasure that you'd only see thru the eyes of grace
Looking for a diamond in the black coal
It feels good when you strike gold
Diamond in the black coal
If you never look then you're never gonna know
Well it's so sad when something so radiate is kept from the light
Cause I've seen divine transformation that Jesus provides
And like a jeweler with a lifeless gemstone
He can make you shine
You could be a diamond in the black coal
It feels good when you strike gold
Diamond in the black coal
You gotta look or you're never gonna know
Precious diamonds
Brilliant shining
It's not always what you see
A good heart is just like a
Diamond in the black coal
It feels good when you strike gold
Diamond in the black coal
You gotta look or you're never gonna know
