

# Sanctus Real, Black Coal

Do you believe in the restoration of a broken life  
Hiding behind a face yeah you never know what you might find  
There in the darkness beneath the surface of time and space  
Could be a treasure that you'd only see thru the eyes of grace  
Looking for a diamond in the black coal  
It feels good when you strike gold  
Diamond in the black coal  
If you never look then you're never gonna know  
Well it's so sad when something so radiate is kept from the light  
Cause I've seen divine transformation that Jesus provides  
And like a jeweler with a lifeless gemstone  
He can make you shine  
You could be a diamond in the black coal  
It feels good when you strike gold  
Diamond in the black coal  
You gotta look or you're never gonna know  
Precious diamonds  
Brilliant shining  
It's not always what you see  
A good heart is just like a  
Diamond in the black coal  
It feels good when you strike gold  
Diamond in the black coal  
You gotta look or you're never gonna know
