

Sanctus Real, Everything About You

Be my light in this darkened room
I'm on my face and I'm calling you
I can't fathom all you've done for me
Everytime it finds me on my knees
Like sunlight in the winter cold
Everything about you, it takes my breath
Away...Hallelujah
I tried this once without you and it was my
Great mistake...Hallelujah
Questions fade when you invade
You chase all my fears away
With your love in my atmosphere
All confusion disappears
And nothing but your truth remains
Questions fade, you remain
You are color on a page of white, bright
Like eyes beneath black lights
Like a glowing city on the plains, you call
My name
Hallelujah
