Sanctus Real, Everything About You (Alternate V

Be my light in this Darkend room I'm on my face and I'm calling to you I Cant fathom all you've done all you've done for me Everytime it finds me on my knees

Like sun light in the winter cold

Everything about you it takes my breath Away...Halleujah I tride this once with out you and it was my great mistake...Halleujah

Questions fade when you invade You chase all my fears away With your love in my atmosphere All confusion disappears

And nothing your truth remains

Questions fade, you remain You are like color on a page of white, bright like eyes beneath black lights Like a glowing city on the plains, you call My name

Halleujah
