Sanctus Real, Nothing To Lose

Give love one to another Give love one to each other And we'll be fine We'll be fine I feel alone, i feel so cold, When i'm apart from you for just one night You keep me alive Feeling fine When i've got something as good as you inside. Got nothing to lost been hanging in twos But i need something to get me through this Nothing to lose been hanging in twos But i need you to get me through this There's no better time Than when i find You in a feeling And know i'm doing alright Nothing to hide, just to confide When i've got something as good as You inside What the world needs now Is a little know how To turn itself right upside down
