

Sarah Connor, Better Half

Been waiting for you the longest time
But I was too shy to speak my mind
I get these shivers down my spine
Everytime you smile or you pass me by

I'm watching you, you're checking me
I think I'm falling in love baby
I'm here with you, you're here with me
Let's get it on

Cause I am a woman that needs a better half
Someone who understands exactly what I mean
That's who I be
I'm a woman, I need a strong man
Someone who understands the better half of me
That is just what I need

I think I need someone by my side
Cause I feel I waste the precious time
(Oh baby) So come on baby, make up your mind
Cause the time don't wait, it just passes by

I'm watching you, you're checking me
I think I'm falling in love baby
I'm here with you, you're here with me
Let's get it on

Cause I am a woman that needs a better half
Someone who understands exactly what I mean
That's who I be
I'm a woman, I need a strong man
Someone who understands the better half of me
That is just what I need

I'll wait for you
Cause I know you need me too
I wait for you
And there ain't nothing I won't do
Baby, nothing I won't do

Cause I am a woman that needs a better half
Someone who understands exactly what I mean
That's who I be
I'm a woman, I need a stronger man
Someone who understands the better half of me
That is just what I need

I am a woman that needs a better half
Someone who understands exactly what I mean
That's who I be
I'm a woman, I need a strong man
Someone who understands the better half of me
That is just what I need

I am a woman that needs a better half
Someone who understands exactly what I mean
That's who I be
I'm a woman, I need a strong man
Someone who understands the better half of me
That is just what I need
