

Sarah Connor, The Best Side Of Life

The best time of the year
Is calling me home
The best time of the year
And I won't be alone
The best time of the year
I'll share it with you
When I look in your eyes
All my dreams will come true
The best time of the year
I follow my heart
Through the wind and the rain
No matter how far
I can feel all the magic tonight
On the best side of life

Your loving arms, your tender smile
We just forget the world around us
For a little while
There's only you and me tonight
I can feel the joy and happiness inside
Cause you're with me

On the best side of life
Is wherever you are
On the best side of life
You're my light, you're my star
I can see our future so bright
On the best side of life
On the best side of life
On the best side of life
On the best side

I can feel it coming, coming over me
I can feel the love so deep and endlessly, oh
It'll be forever, it'll be alright
I can feel the joy and happiness inside
Cause you're with me tonight

On the best side of life
Is wherever you are
On the best side of life
You're my light, you're my star
I can see our future so bright

Your loving arms, your tender smile
We just forget the world around us
For a little while
There's only you and me tonight
I can feel the joy and happiness inside
Cause you're with me

The best time of the year
I follow my heart
Through the wind and the rain
No matter how far
I can see our future so bright
On the best side of life

On the best side of life
On the best side of life
Cause you're with me tonight
The best side of life
Cause you're with me tonight
