

# Sarah Connor, Wait 'Til You Hear From Me

[intro]

This song is about Maria  
A close friend of mine  
Who lost herself in drugs  
She told me to wait for her  
But guess what...  
She never came back  
And I'm still waiting  
She told me:

[chorus]

Wait 'til you hear from me  
Monday, Tuesday it won't be  
Wednesday, Thursday we will see  
If only you can wait baby

Wait 'til you here from me  
Friday use your fantasy  
Saturday you got over me  
If only you can wait baby

[verse 1]

She was called Maria and she really was a friend  
I remember when we were walking hand in hand  
She was telling me that she understands  
All the world and every thrill by taking little pills  
So she was trying everything and more  
Alcohol and speed, coke and weed and tried to score  
Tragedy: she didn't feel much better than before  
So she got away here quick to find a better kick

[bridge]

Never let it - wanna find her  
Can't forget it - to remind her  
She's my sister - wanna tell her  
How I miss her - she told me

[chorus]

[b-chorus]

Wait - don't call you've got to  
Wait 'til you hear from me  
Wait - that's all you've got to  
wait...

[verse 2]

When she arrived in the city of the stars  
Blinded by the lights, a burning in the heart  
She believed to play what she called her part  
A member of society to satisfy her dreams  
No one paid attention on her skills  
So she found crack is another way to fill  
The emptiness inside right now she got her thrill  
Guess, who gave his life away? she did it every day

[bridge]

[chorus]

[narration-part]

Why did she throw her life away?  
Why did she say don't call just wait?

[c-part]

If you wanna go to the city of stars  
Can you help me to find my girl Maria  
She once was an actress and a beauty queen  
Then the drugs took over and made her mean  
I tried to stand by her side make her feel alright  
But she wished to get over to the other side  
And since I can't really get her out of my mind  
I'm asking you, won't you help me to find  
She told me

[chorus]

[b-chorus]
