

Sarah Masen, Carry Us Through

I took a train headed home
Where the colors stream and my thoughts they go
I was looking Lord for the
Wind to blow
Come carry us through
Sometimes theres doubts
When the dogs they bark
And you're just not sure what is in the dark I start to cry but then the Wind
goes by
To carry us through
Carry us through carry us through
Carry us through carry us through
Looking for the Wind to blow
To carry us through
When we think that it's over
Baby we find new things to be afraid of
We can pray till we're older
And believe that there is hope even in the night
There is hope
We grab existence by our defeats
And somehow laugh when we are weak
We're being made strong from underneath
Carry us through carry us through
Take off of your shoulders
The burdens that you carry of your own regret
Someone else needs holding
And it's very hard to smile when you are all stuck inside yourself
So we close our eyes and we see the Light
There are so many to hold on tight
Don't be afraid to pray just like a child Lord carry us through
Carry us through carry us through
Carry us through carry us through
I been praying Lord I'm so overdue
Lord carry us through carry us through
Carry us through carry us through
Carry us through carry us through
But Lord come on where are You
You come carry us through carry us through
Come carry us carry us through
