

Sarah Masen, Jenni's Face

Don't know much about Love Think it starts with belief

I've seen it there for healing

Can feel it beneath my feet

Don't know much about Love Don't think it can replace belief

I can feel it when I'm kneeling Coming up from underneath Wondering at the mystery

Hoping with a German grace Because there's my cousin Jenni's face She wants to do it right

She wants to do it right

Friend works in a factory

My father he does too

They work as an assembly line

For the UAW

And it's beautiful in Detroit

Because someone's getting through And it's work at building delight It's what we do

It's what we do

Hope's personified

In my baby brother's eyes

He says breathing's no mistake

You embrace that idea

Praying for direction

And hoping with a German grace

There's always cousin Jenni's face

She wants to do it right
