

Sasha, Good Days

I got nothing to hide
But the ghost
They just won't
Leave me alone

But with you by my side
There's a light
At the end of the tunnel

And I keep running
I keep running
I keep running with you

Green lights and a radio
No stop signs or crossroads
Stars up and a place to go
Let the good days follow

Good days follow
Good days follow
Won't leave a track
No looking back
Let the good days follow

Let the good days follow
Good days follow
Won't leave a track
No looking back
Let the good days follow

Not a minute to lose
Got our lights turned
On the setting sun

All the cuts and the bruises
Are now just scars
That we can share

And I keep running
I keep running
I keep running with you

Let the good days follow
Good days follow
Won't leave a track
No looking back
Let the good days follow

Let the good days follow
Good days follow
Won't leave a track
No looking back
Let the good days follow

(Good days, good days, good days)

Green lights and a radio
No stop signs or crossroads
Stars up and a place to go
Let the good days follow

Let the good days follow

Won't leave a track

No looking back
Let the good days follow

(Good days, good days, good days)

Let the good days follow

(Good days, good days, good days)
