Saxon, Lights Inthe Sky

Silver ships across the sky Something I have never seen before Was it true or fantasy I don't know the answers anymore All I know is what I saw Something shooting fast across the sky

Did we see a rocket ship (*)
From another star
Shooting through our galaxy
Coming from afar
I shee your lights
Shining in the sky
Shining in the sky

Leave your signs across the land Mysteries, the answers that we seek Coming from another world Seen your circles in the golden sheaf One day soon we'll talk to you Find out if you come to us in peace

(Repeat *)
