

Saxon, Remember The Fallen

It came across the China sea
No one knew the threat to you and me
All the warnings came too late
The battle started slow and sealed their fate
A silent killer stalked the streets
A chance to spread across to all we need

When the war is done
Our lives will never be the same

Remember the heroes
Remember their lives
Remember the heroes
Remember, remember the fallen
Remember the fallen

Just like the plague, it traveled fast
Taking down whoever crossed its path
It started first with sick and old
[] never really []
The science tried to find the virus
Kill the beast before it devours us

When the war is done
Our lives will never be the same

Remember the heroes
Remember their lives
Remember the heroes
Remember, remember the fallen

Is it never-ending?
Will we ever be free?
How long will it take
To bring normality?

So many died before their time
To put their lives upon the line
The fatal [] tore through us all
Some survived while others seemed to fall
No one took it serious
What caused it all is so mysterious

When the war is won
Our lives will never be the same

Remember the heroes
Remember their lives
Remember the heroes
Remember, remember the fallen
Remember the fallen
Remember the fallen
Remember the fallen
Remember
Remember, remember the fall
